Description
When I click "Install" for FlowPlayer I get the error:

wiki-plugins/flowplayer/flowplayer/flowplayer.js to lib/flowplayer/flowplayer.js impossible to copy

It won't install and I have no idea what to do next.

Thanks for any help.

Workaround
You can attempt to install manually.

Using Admin Mods to install mods is problematic; manual installation (get the files via web browser and install via ftp) is a workaround. Flowplayer itself works in 2.2 (in use at zukakakina.com, etc.)
