Description
contributors (from contribution feature) are not listed on the contributors list at the bottom of a wiki page in view mode. (collaborative style set at wiki admin)

They are shown in history of the wiki page in a new column called "contributors", which is fine, but when viewing a page, and when wiki set up as collaborative style for listing contributors, author and those "contributors" should be included all together in the list of contributors.
Example:
http://www.iesbarcelona.org/ESSO350/tiki-index.php?page=2009s%20EAP%20Buses%20and%20Metro

listed three users (Authors) as contributors.
However, if you go to history:
http://www.iesbarcelona.org/ESSO350/tiki-pagehistory.php?page=2009s%20EAP%20Buses%20and%20Metro

you can see a fourth user in the contributors column.
That user can't see her name on the list of contributors, and requests for help to site admin due to that fact, etc.
