Description
I created multiple forums and when I try to sort by name (asc) or name (desc), it doesn't seem to work.

See screenshot here:
http://dev.tikiwiki.org/show_image.php?id=104

Thanks

Title: Forum Sort_by_Title Issue

Still a problem in V5.1.

Set the local default sort order to Title and the forum gives error message on access.

While in TW default sort order (Post_Date), clicking to sort by Title, gives an error page (see attached).

Get the same error for columns: Type(object), Emoticon(object), Title($), Reads(numeric), Author($), Actions(object).

Works OK for folumn: for: replies(numeric), LastPost(date).

~~---twTitleSortErrMsg---~~
An error occured while performing the request.

Things to check:

1. Did you complete the Tiki Installer?
2. Is your database corrupt? Please see how to repair your database
3. Are your database credentials accurate? (username, database name, etc in db/local.php)

Please see the documentation for more information.
