### Description

Our org is trying to create a tracker for short term employment vacancies. In the tracker we have a date field called "deadline" where we want an applicant to respond to the vacancy before that date. What we would like is for the vacancy (tracker item) to change status to "close" after that date automatically.

I have found in [http://dev.tikiwiki.org/tiki-view\\_tracker\\_item.php?itemId=1694](http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=1694) that sylvie made a comment:

""

- must be finished before can be a date field. what happens to the item after? (I have on my list 'an item change status after n days')  
which sounds roughly the same as what I am trying to accomplish.

""

Can someone elaborate or let me know if it is possible to automate the closing of items?

Thanks,  
Tim

Could you check the part of <http://doc.tikiwiki.org/batch> about trackers and say if that does what you need?

tpinet 20 Aug 10 18:20 GMT-0000

I read the description on the batch page. Is this feature only in 6.0 because I can not see those fields in my tracker config on my 5.0 installation.

Also, the status change looks to only work x time after the item was created. I would like a status change after field y date-time has been reached. The field in my case is a deadline and the item must be closed after the deadline.

Philippe Cloutier 20 Aug 10 19:09 GMT-0000

Yes, it will only be included starting from Tiki 6.

OK, the feature does not do what you want.
