Description

Say I have a desktop spreadsheet file. I can copy-paste this to Tiki spreadsheet and it makes it fun & fast to move data to Tiki. (It's also easy to export to .csv to re-use in the desktop spreadsheet).

But what if I want my info in a tracker?

PluginTrackerList has displaysheet=y which displays in spreadsheet view. This is nice but we'd need to be able to edit existing records, and easily add records.
