Description
I am routinely setting up show instances.

Going through 1st login password change / set is a pain.

I created http://jyhem-9952-5119.show.tikiwiki.org
I logged in with admin/admin
Password change was enforced so I set it to "azerty"
I logged out

I used «reset passwrd to 12345»

I logged in again with password "12345" (not azerty) and it logged me in and did not enforce any password change.

Did I miss the real scenario ?
