Description

When entering tiki-login_scr.php, only the login box can be seen. There is no "Login box", typically located in the top right corner

1) Try a login with an invalid user

The error is shown "inline" with the login box.

The "Login box" also appears at the top, which it shouldn't

2) Try a login with an invalid password

The error is show in the error screen, which is a completely new screen.

Should be, for all errors

1) Errors are reported "inline" with the log-in dialog

2) The "Login box" should not be shown on the log-in screen.

r50668 fixes #1. All errors are now display "inline" with the login dialog on tiki-login.php

1. 2 is still pending.
