Description

1. Create a MS word file.
2. Enter any word in the file. (In my case, it was "outside")
3. Create a table in the word file and enter a text into a cell of the table. (In my case, it was "inside", "insider", "Inside2")
4. Save the Word file.
5. Upload the file to File Gallery (12.x of demo.tiki.org)
6. Rebuild the index and "Reindex all files for search" (Admin -> Admin Home -> file Gallery -> "Search Indexing" tab)
7. Search for the words.
8. Result
 1. Tiki found the word "outside" (which is outside of tables)
 2. Tiki could not find "inside" (and its variants, which are inside of tables)
