### Description

The maketoc plugin displays multiple TOC's (one from each Language displayed) on the left hand side when the international "all languages" feature is used.

The screenshot shows two Tiki pages side-by-side, both titled "Theory of Colours".

**Left Page (German):**

- Header: Zur Farbenlehre
- Section: Goethe's Theory of Colours
  - Translator's Preface
  - Freface to the First Edition of 1810
  - Introduction
- Section: Zur Farbenlehre
  - Johann Wolfgang Goethe (1810)
  - Vorwort
  - Einleitung
- Section: Entwurf einer Farbenlehre Didaktischer Teil
  - Zweite Abteilung Physische Farben
  - Dritte Abteilung Chemische Farben
  - Vierte Abteilung Allgemeine Ansichten nach Innen
  - Fünfte Abteilung Nachbarliche Verhältnisse
  - Sechste Abteilung: Sinnlich sittliche Wirkung der Farbe
- Section: Zur Farbenlehre
- Section: Johann Wolfgang Goethe

**Right Page (English):**

- Header: Theory of Colours
- Text: Translation of this page is incomplete.
- Section: Goethe's Theory of Colours
  - Translator's Preface
  - Freface to the First Edition of 1810
  - Introduction
  - Part I - Physiological Colours
  - Part II - Physical Colours
  - Part III - Chemical Colours
  - Part IV - General Characteristics
  - Part V - Relation to Other Pursuits - Relation to Philosophy
- Section: Goethe's Theory of Colours
- Text: TRANSLATED FROM THE GERMAN: WITH NOTES BY CHARLES LOCK EASTLAKE, RA., F.R.S.  
\*\* Cicero Yarietatem propria in coloribue naaci, hinc in alieom migrare exiatimavit. Certfe non alibi natura conponenda aut maiore.

The screenshot does not clearly demonstrate the bug to me, who do not understand German, but I am guessing the bug can be seen in the left side's TOC, which should not contain both German "Einleitung" and English "Introduction".

Philippe Cloutier 07 Jun 18 13:40 GMT-0000

This bug probably has the same cause as maketoc adds bogus content to search index, causing false positives, so both should be solved simultaneously. Until Tiki 18, the parser was not contextual. Function parse\_data\_process\_maketoc had to store headings in a global \$anch variable. This could now be solved by changing that from a function variable to a property of the Parsable class, if there is no better solution. I suspect this is needed, because if page Parent includes page Child, we (may) want Parent's TOC to include Child's headings. Nevertheless, fixing this under 30 minutes is optimistic.
