Description

Hello,

we are using some structures for making a toc page. If i add a page since we have updated to 12.1 i can put it in the list and move it to the right position. But if i click on the save button nothing happens. The progress cycle appears and nothing happens. In this structure we have about 50-100 pages.

I've created a new structure and added one page i could save it too.

Best regards,

Tobias Jacobi

Comment here since comments tab currently doesn't display properly:

If you could reproduce this issue in a show.t.o instance atached to your bug report, maybe some developer might be able to give it a chance to debug it.
(it's beyond my skills, but others might give it a shot)
thanks!
