### Description

UI of Feature External Wikis in 14.x shows 2 extra unrelated fields, compared to previous versions, such as with Tiki 12.

See:

## Comments

Gary Cunningham-Lee 27 Apr 15 05:16 GMT-0000

Do you mean the "index" and "search as"? If so, they were added by LP in r52273 last August : "[NEW] Allow specifying the index name in external wikis to enable searching through federated sites (within the same cluster)".

Xavier de Pedro 27 Apr 15 13:20 GMT-0000

Yes, Gary, thanks, I didn't know about that.

There seems to be another field besides "Index", which is "Search as", and it shows "Array" as default value there, which doesn't seem to be right to me.

(I have no clue what is that for).

In any case, the new features should have:

1. some documentation updates in
    1. the corresponding pages of doc.t.o, at least,
    2. in the corresponding doc.t.o/TikiNN page (NN being the version when it was introduced)
  2. features exposed in the Updates Wizard corresponding to that new version
