Description
I have a real-life case of three Trackers:

- Organizations (companies)
- Offices (within Organizations)
- Members

Offices have an Item Link to Organizations
Members have an Item Link to Offices and a Dynamic Item Link to Offices

This does not work:

- I can create/edit Organizations (OK)
- I can create/edit Offices (OK)
- When creating/editing Members, I can create missing Organizations in the Organizations Tracker (OK) But I can never select Offices. The drop-down is always empty... (NOT OK)

Note: I can also not create missing Offices in the Members creation modal but I went around this in real life using a template with an extra button. This is an off topic wish foe another wish.
