Description

If you post a message to the forum you can enabling e-mail notification.

Assume, you have the following message:

- my Message (watched)

Now you get an answer:

- my Message (watched)
- answer

A notification is sent about "answer", because the thread is watched.
now you receive a second answer, to the answer before

- my Mesage (watched)
- answer
 - sub answer

You won't get a notification about "sub answer".

Solution

All messages, regardless of nesting level should produce a notification message to the registered users on the watchlist
