Related-to

- ● Some wiki page history versions are getting lost on doc.tiki.org (Tiki 17.x) (data loss)
- ☒ Rollback (to a previous revision of a wiki page) should permit to indicate a comment (to explain why)
- ☒ Rollback should indicate who did the rollback
- 🟡 12.x dev.t.o: diff in wiki history after last wiki page edit shows someone else's edit as mine (!!!)

Description

I just rolled back to version 49 of <https://dev.tiki.org/Semi-automatic+merging+period> and the comment indicates

"fix [Rollback by Chealer9 to version 49]"

It should be marclaporte. not Chealer9

And my previous rollback has disappeared. Perhaps the system has problems with multiple rollbacks?

We are experiencing this on Tiki 15 (issue #5647 in the local ITS). I may get to it in the coming months.

Roberto Kirschbaum 24 Aug 17 12:26 GMT-0000

Hi Marc,

fix Rollback by Chealer9 to version 49 It should be marclaporte. not Chealer9

I believe fixed it in Trunk: <https://sourceforge.net/p/tikiwiki/code/63644/>

And my previous rollback has disappeared. Perhaps the system has problems with multiple rollbacks?

I still don't know much about this and the other misbehaviors. What I noticed here in my local environment is that after a certain number of rollbacks I got this error message when trying to do one more rollback: Duplicate entry 'Many version page-24' for key 'PRIMARY'.

Actually, after many rollbacks this wikipage has two versions 23 in tiki-pagehistory.php). However in the database table `tiki_history` I obviously don't have duplicate versions, and the highest version is 24.

Marc Laporte 24 Aug 17 15:56 GMT-0000
Looks like you found the root cause!
