Description
Using the following code in a Wiki Parsed module

example module code

{if isset($objectCategoryIds) and in_array(42, $objectCategoryIds)} In category {/if}

should show the text "In Category" when the wiki page currently shown in the center column is in the category with id 42.
~~This works only on pages without spaces in their names.~~ Things seem to have changed. This works with pages that have spaces in their name, but not if the spaces are being replaced by dashes.

The above code should also work when on a wiki page with spaces in it's name.
