Description

When using WYSIWYG in HTML mode (wysiwyg_htmltowiki disabled), the WYSIWYG help available by clicking the blue question mark at the right assumes that the wysiwyg_wiki_parsed preference is enabled:

1. The first tab claims that "Wiki plugins can be used and edited in WYSIWYG mode" since r30245.
2. The second tab offers adding plugin calls, as if they would be interpreted.

In fact, it is known that the implementation "is not designed to work best" when wysiwyg_wiki_parsed is disabled (even though the idea behind wysiwyg_wiki_parsed is unrelated to WYSIWYG). The first tab contains:

“

This new implementation is designed to work best with some site preferences set in a certain way. These can all be found on the WYSIWYG admin page. A profile to set these up correctly can be found on profiles.tiki.org which can be applied using the profiles admin page.

The WYSIWYG_6x profile enables wysiwyg_wiki_parsed.
