Description
    Allow to override global setting to create toc in a specific page through PluginPdfPage
    Otherwise, you get 2 table of contents in a wiki page ifyou have that parameter set globally in print control panel, and you also have toc in a long wiki page in production.

    Example (where you can't override that setting):
    http://seeds4c.org/Ubuntu+16.04+LTS+for+Human+Beans

Importance
    5

Easy to solve?
