Isn't it how it always worked with the structures breadcrumbs?

Marc Laporte 06 Oct 18 23:51 GMT-0000

I don't know for sure. I think I would have noticed before because it leads to empty pages.

@**Xavier de Pedro**? Bueller? Bueller? Anyone?

Xavier de Pedro 08 Oct 18 06:38 GMT-0000

usually related (at least in teh past) to same page in a structure belonging to another structure also. and no "Default structure" concept in Tiki or similar, so Tiki doesn't seem to know which structure to use for that toc, etc. It happens in plenty of places in doc.t.o (for years) afaik

Marc Laporte 08 Oct 18 06:41 GMT-0000

hmmmm, this page is in one real structure and one phantom structure...

Looks like we need Victor and Jonny
