Description
The page "comments" on tiki.org returns a 404 not found.

I have looked in the wiki pages, and we do in fact have a comments page, so something must be broken there. Not sure if this is a tiki bug, or bad data or what, but the error message (404) is really not very helpful.

https://tiki.org/comments — is broken
https://tiki.org/tiki-index.php?page=comments — works

https://tiki.org/changelog — is broken
https://tiki.org/tiki-index.php?page=changelog --works
