Description

We need to provide natural sorting of the `Priority` field in the bug tracker at dev.t.o

Example: click at sort bugs in the wishlist page by Priority in descending order:

https://dev.tiki.org/tiki-index.php?session_filters=y&tr_sort_mode1=f_138_desc&page=Wishlist

First, items with priority 90 are shown.

After that, items with priority 9 are shown. However, between 9 and 90 there are lots of priorities that should be shown before 9 is shown, if they were understood as numbers, not as characters.

See:

<https://www.php.net/manual/en/function.natsort.php>
