Related-to

- Insertion_syntax is broken when uploading a file in a wiki page using the Tikifile upload icon (plugin?)
- File Gallery: fatal error when trying to choose from uploaded images using the browse option

Description

While trying to insert a file or image into a tiki page, the editor user interface will not load that image using "Browse Gallery" when that file is clicked on.

Please see show instance for 19.x and the same issue is present in tiki 20.x

Solution

Hopefully the fix i did for item7266 will also fix this ba6420ff ? If it fixes it for you on 21.x i'll backport it to 20.x too (19.x is gone now)

Changed home page message on tiki instance for this bug. 😊

Bob 16 Feb 20 08:09 GMT-0000

Same problem in the Tiko.org demos and my installation:

<http://demo.tiki.org/20x/tiki-index.php>

<http://demo.tiki.org/19x/tiki-index.php>

This demo-page ist working good:

<http://demo.tiki.org/15x/tiki-index.php>

Demo 18x is not working at all.

Bob 19 Feb 20 18:17 GMT-0000

Just installed 21.0.beta, same thing

Version 18.4 works fine

luciash d' being 09 Mar 20 17:21 GMT-0000

Can you retest and confirm if it has been fixed? Thanks

John Morris 05 Jun 20 17:00 GMT-0000

Luci, still not working. If your gallery is set to "Use elFinder UI" you can then choose a file from the gallery, and populate the page with the file. If you are using standard gallery though, it just keeps looping back without populating the page with the file chosen.
