Description
Hi,
Is there a way of sorting content by means of "sort" control block sorting by more than one value? for example I'd like to execute a first sorting based on column A value; than, for each column A value, I'd like the content to be further sorted by column B value (hope it'clear).

Currently I use something like

```
{LIST()} {filter field="tracker_id" content="..."} {sort mode="tracker_field_..._asc"} ... {LIST}
```

I think it could be used something like

```
{sort mode="tracker_field_sortingField1_asc"} {sort mode="tracker_field_sortingField2_desc}
```

Or alternatively

```
{sort mode="???" modes="tracker_field_sortingField1_asc, tracker_field_sortingField2_desc, ..."}
```

in a similar way w.r.t the already existing syntax

{sort mode="randommode"
modes="title_asc,tracker_field_example_asc,tracker_field_ticketNumber_nasc,
modification_date_nasc"}

Thank you for your attenction
