Description

Page: 1/0 happens when listings contain 0 items.

It is a harmless but ugly bug.

Also, while we are playing here, why is it that when:

```
{if $direct_pagination eq 'y'}
```

we see the standard pagination (prev/next) AND the direct (1) (2) (3), etc ?

It seems to me if everything fits on a page, no need to have a search (filter option) and no need to have pagination.

All the ones seen in the demo should be fixed, at least:

<http://demo.opensourcecms.com/tiki/>

Solution

Two fixed so far. Please help fix everywhere in BRANCH-1-9!

http://tikiwiki.cvs.sourceforge.net/tikiwiki/tiki/templates/tiki-list_articles.tpl?r1=1.27.2.15&r2=1.27.2.16

<http://tikiwiki.cvs.sourceforge.net/tikiwiki/tiki/templates/tiki-listpages.tpl?r1=1.22.2.15&r2=1.22.2.16>

This is solved with the new pagination system. As this is propagated everywhere, everything will be solved.

Pagination_links are now propagated everywhere. So this item will be closed.
